Greeting

"Good day, and welcome to Bank of Sri Lanka. You're speaking with our virtual assistant. What can I assist you with today?"

STEP 1 — Customer Intention

The caller states their need. The agent identifies one of three service paths:

Account Balance	Block Debit Card	Account Details
-----------------	------------------	-----------------

"Of course. Could you please state the account number you'd like me to look into?"

"And just to confirm — is this a Personal or Current account, or is it a Business account?"

STEP 2 — Voice Verification

Four security questions, all spoken. No keypad entry is required at any stage.

Q1 — NIC Number

"To get started, could you please say your National Identity Card number?"

■ Business: Please say the NIC number of the primary account holder.

Q2 — Branch

"Thank you. Which branch was this account originally opened at? Please go ahead and say the branch name."

■ Business: Please say the name of the branch where the business account was registered.

Q3 — Date of Birth

"Could you please say your date of birth — the day, month, and year?"

■ Business: Please say the date of birth of the primary account holder.

Q4 — Mother's Maiden Name

"And finally, could you please say your mother's maiden name?"

■ Business: Please say the maiden name of the primary account holder's mother.

STEP 3 — Identity Confirmation

VERIFICATION FAILED — Up to 3 attempts permitted

"I'm sorry, I wasn't able to match that information. You have [X] attempt(s) remaining — please try once more."

"I'm afraid I'm unable to verify your identity at this stage. For your security, I'll transfer you to one of our team members who can assist you further. Please hold."

→ After 3 failed attempts: transfer call to a live agent.

VERIFICATION PASSED

"Thank you for that. I've confirmed your identity successfully. Give me just a moment while I retrieve that for you."

STEP 4 — Serve Request

The agent serves the request stated in Step 1. Responses are split by account type.

Account Balance

PERSONAL / CURRENT

"The available balance on your account ending in [XXXX] is [amount]."

BUSINESS

"The current balance on your business account ending in [XXXX] stands at [amount]."

Block Debit Card

PERSONAL / CURRENT

"I'm placing a block on the debit card associated with account [XXXX] now. That's done — your card has been successfully blocked and you're fully protected."

BUSINESS

"I'm blocking the debit card linked to business account [XXXX] right away. That's confirmed — your corporate debit card has been blocked successfully."

Account Details

PERSONAL / CURRENT

"Here are the details for account [XXXX]: it's a [type] account, opened on [date] at our [branch] branch. Is there anything else I can help you with today?"

BUSINESS

"Here are the details for business account [XXXX]: registered under [company name], opened on [date]. Is there anything else I can help you with today?"

STEP 5 — Wrap-Up / Loop

If the caller requires further assistance → return to Step 1 and capture the new intention.

"It was a pleasure assisting you today, [Name / Company Name]. On behalf of Bank of Sri Lanka, we wish you a wonderful day. Goodbye!"

Note: All verification responses are spoken — no keypad entry is required at any stage. The account number is collected at Step 1 alongside the caller's stated intention and is not part of the verification sequence.
